

## **bleiCOLOR-SK**

Self-adhesive, colour-coated lead sheet.

# bleiCOLOR-SK

## Quick and easy sealing

### All-rounder for roofs and façades

Lead sheet is one of the most traditional materials used for roofs and façades. Extremely durable, one hundred percent recyclable and offering outstanding cold-forming properties, it has been the material of choice for sustainable construction for centuries.

### Easy to work

bleiCOLOR-SK is a variant of the proven classic bleiCOLOR that is self-adhesive over its entire rear side. It is particularly suitable for all sealings between roofing and adjoining building components. The strong adhesive layer makes working on roofs and façades easier, enabling the product to be laid quickly and cost-efficiently. At the same time, bleiCOLOR-SK offers the strengths of classic lead sheet products.

### Uniform colouring

The colour-coated surface is available in the standard roof colours. bleiCOLOR-SK thus blends harmoniously into the appearance of the building while retaining its attractive, uniform colouring. bleiCOLOR-SK is extremely UV- and weather-resistant and can be formed flexibly.

### STANDARD DIMENSIONS

#### Rolled product

300 x 5,000 mm

450 x 5,000 mm

Composite material thickness = 1.5 mm

Other dimensions available on request.
