

Product Stewardship Code of Practice Declaration

All members of Calder Group are committed to applying the highest standards of product stewardship. We aim to ensure that the health, safety and environmental aspects of our products are responsibly managed throughout their life-cycle

To achieve this objective we will:

Purchasing

- Buy 100% of our lead requirements from recycled materials.
- Ensure that our suppliers maintain the highest standards of health, safety and quality.

Manufacturing

- Ensure that all manufacturing sites are accredited to ISO 9001, ISO 14001 and OHSAS 18001.
- Monitor the lead-in-blood level of all our exposed employees to ensure compliance with the current REACH DNEL of 40 µg/dl for men and 10 µg/dl for women.
- Commit to achieving continuing reduction in LIB levels with a target of 25 µg/dl for all workers by 1st January 2020 and 20 µg/dl by 1st January 2025.

Sales outlets and distribution channels

- Label all lead sheet articles in compliance with REACH article 33.
- Provide access to all appropriate Safety Data Sheets.
- Provide access to appropriate additional risk management advice for the handling of lead sheet.

Downstream users

- Make Safety Data Sheets available on our websites for easy access by professional users.
- Provide training materials, including advice on risk management measures, for professional users.
- Highlight the importance of regular lead-in-blood sampling of professional users as a health monitoring tool, and promote the reduction of LIB lev.

End of life recycling

- Promote the recycling of all scrap arising from lead sheet.
